

# Sharing e.GO

Team Haths

# OUR IDEA

❖ Based on sharing ego-digital cars.

- More Efficiency
- Much Money Save
- Environmental friendly

# Easycar App

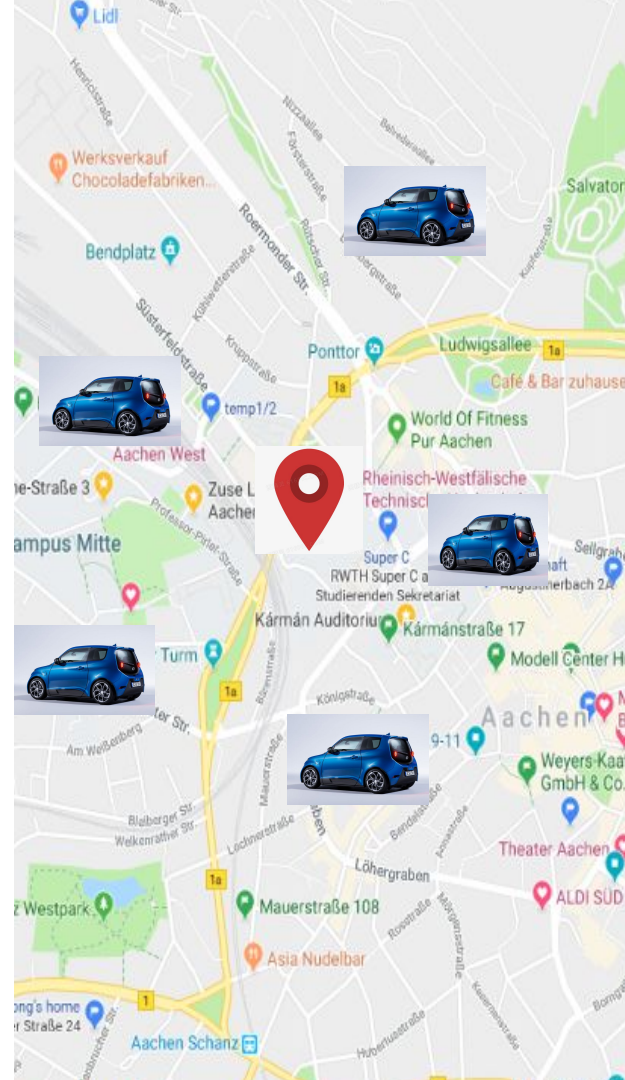

## 1. Based on Sharing Cars Location

nearest sharing cars recommendation

set starting point on App, get nearest eGOs infos.

- distance
- basic status

user choose his/her ideal car and use it.

# Easycar App

2. Smart e.GO is analogy to **smart home**

- adjust the car in your first drive
- apply your setting to every car you take

Save your time & Comfortable

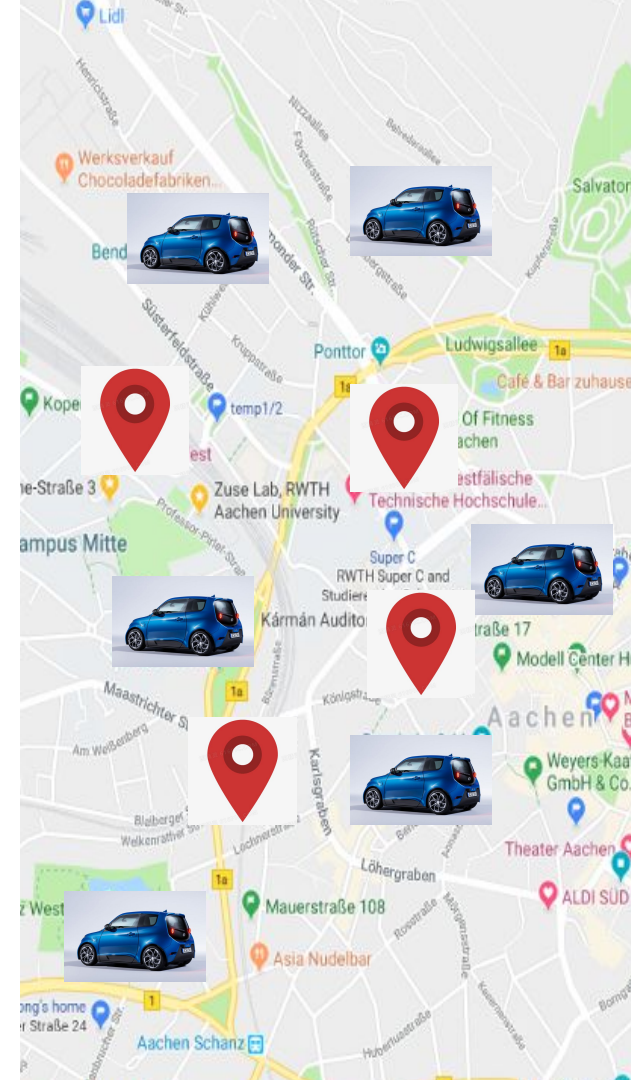

Continue and outlook

Selfdriving sharing e.GO

Based on Minimum-Cost Bipartite Matching

algorithm -> Global Optimum.

$$\text{Weight} = T(\text{user waiting time}) * \lambda + \text{Cost}(\text{Distance})$$

**Thank you for your Attention!**
